**(1) Deputation concerning the Council Communication of the Climate and Biodiversity Emergency**

Spokesperson Venetia Carter

Supported by: Josie Darling, Sue Goodwin, Carn Hemingway, Tash Fairbanks, Sarah Gorton, Penny Bay

**Summary**

We are at a time of ecological crisis.

The science is clear that we are in the sixth mass extinction event and that untold human suffering\* will result if we fail to act proportionately on the climate and ecological emergency.

It is hard to face these facts and easy to look the other way. But just because we do, the problem will not cease to exist.

Both the natural world and human civilisation depend on a stable climate. The climate crisis is accelerating faster than most scientists predicted and is more severe than

anticipated. This threatens global food supplies bringing the threat of global hunger and conflict that will disproportionately harm the most vulnerable. The changes will last many generations.

This Council was one of the first in the UK to declare a climate and biodiversity emergency and did so unanimously. Since then Covid has shown us what an emergency response looks like and how the people are willing and able to change their behaviour for the public good.

Courage to speak of the dangers we are in is needed.

Difficult financial decisions will need to be made to meet the 2030 target set by the Council. However, the act of making clear that we are in an emergency is not expensive.

There is nothing on the home page of the council website page to indicate that a climate emergency has been declared. The page that is headed "climate change", similarly makes no mention of an emergency. The website should be changed to reflect the declaration of emergency.

When there is danger, the alarm must be sounded. How else are we to prepare ourselves?

We appeal to you as representatives of your community to find the courage to face an uncertain future and tell the people of Brighton and Hove the truth so that we can work together to be part of the solution.
