The following written questions have been received from members of the public.

**1. Question from Adrian Attree — Arrangemengts for Asthmatic Sufferers, St Peter’s Medical Centre, London Road, Brighton**

“PHE’s COMEAP 2018 report on NO<sub>2</sub> says, when NO<sub>2</sub> is over 188ug/m<sup>3</sup> ‘one quarter of people with asthma would experience a ‘clinically relevant’ increase in airway responsiveness’. The expanding St Peters Medical Centre is in a location of high pollution. The bus stops on London Road that serve patients are expected to exceed 188 during busy rush hours. Therefore at these times one quarter of asthmatics who have visited the surgery and wait for a bus home will suffer an asthma attack as a direct result of their visit to the surgery. How is this being addressed?’

**Chair’s Response:****2. Question from John Kapp – Arrangements - Addiction and Rough Sleeping**
