## Resident Questions for Housing Area Panel

Reference Number: C3.5

| Department | Housing |
| :--- | :--- |
| Date question raised | 24.10 .2022 |
| Week of Area Panel | 12.12 .2022 |
| Area in city | Central |
| Star rating applied by residents | 3 |
| Deadline for officer response | $16^{\text {th }}$ November 2022 |
| Name of officer responding | Grant Richie |
| Officer job title | Head of Repairs and Maintenance |

## Resident Question

| Title of <br> Question | Rationalising the repair system |
| :--- | :--- |
| Issue: | Repairs could be carried out in a more cost-effective and rational <br> way if there was more of an overview. For example, if one <br> household has three different plumbing issues, these should be <br> dealt with in one visit rather than on three separate occasions. |
| Background: | Central residents' experience of the current situation is that <br> multiple visits are made even when the repairs can all be done by <br> the same person - eg several different plumbing problems. This is <br> frustrating and involves delays in a situation where residents are <br> already having to wait a long time for repairs. |
| Action <br> requested <br> by <br> residents: | Residents asked for a report on <br> a) why this situation occurs and <br> b) what can be taken to make the system more cost-effective and <br> rational. |

Officer Response

| Officer <br> contact <br> details: | Grant.Ritchie@brighton-hove.gov.uk |
| :--- | :--- |
|  | The Repairs service is organised to complete repairs with a <br> minimum number of visits. However there are occasions when <br> more than one visit is required. This may be because the scale of <br> the repair was not evident when first reported or once the repair <br> Oas started the amount of work is greater than estimated. There <br> Response: <br> are also some tasks such as lifting a bath or working off a ladder <br> that will always be a two-person task for Health \& Safety reasons. <br> Whilst we like to try and send the same person to complete a task <br> this is not always possible. Our staff time is planned days in <br> advance. If a job runs over from the previous day an operative who |

|  | is free or has space in their diary will be sent, this may not be the <br> same operative who started the task. <br> When a job is raised against an address any other job in the same <br> trade on that address should also be sent to the operative. This <br> should stop multiple staff being sent to do similar tasks. However, I <br> do accept that there are sometimes mistakes and other repairs are <br> missed so additional visits are made. I also recognise that the task <br> may be wrongly reported sometimes and therefore the operative <br> attending may not be suitably equipped for the repair or have <br> enough time to complete the works. <br> One of the main problems the teams are facing now is the quantity <br> of repairs that they have to attend to. As we have previously <br> reported we currently have a backlog of works. To reduce this <br> backlog, we are using the available staff to clear as many tasks in <br> a day as possible. However, this means that they do not have <br> spare time, so if they do identify additional works when completing <br> a task they will often not have adequate time to complete them. <br> As the backlog reduces, we plan to undertake more <br> comprehensive repairs on the first visit which will provide a more <br> efficient service and greater customer satisfaction. |
