StaffSafe® has over 20 years' experience in keeping your staff, property and customers safe and, over this time, we have honed our service and developed the in-house skills that make us the go-to partner for retailers seeking to protect their staff and customers in the toughest of high street environments.

We are different to the majority of alarm receiving centres who will typically provide a simple escalation path to call the emergency services. We are different as we are on hand 24 hours a day to take control of situations, de-escalate threatening events and reassure staff that help is on the way when needed.

Our Digital offering provides super fast direct IP connectivity, making StaffSafe the quickest response time in the industry.
