|--------------|-----------------------|-----------------|--|
| | Support | 8 | As such, the delivery of affordable housing should be a key priority for the City Plan. Future development plans for the city should take full account of the unique assets on the Royal Pavilion Estate, not just the Royal Pavilion, and the ambitions of the organisations The plan is too long and could be shortened by avoiding the repetition that is found within the development and special area |
| Part One: | Partly Support | 11 | Policies. Biosphere management strategy would be best considered as one of the 'Sub-regional local strategy statements' Consideration should be given to the broader economic and tourism role of education and this should be reflected in the City Plan analysis/assessment. |
| Introduction | Object | 5 | Acknowledgement of the importance of maintaining access to sunlight for residential properties and gardens. Need an urban design framework that prevents the loss of sunlight to gardens and properties. Lack of sufficient information and detail on various draft policies with which to make reasoned responses. No evidence on working with neighbouring authorities under the |
| | Partly Object | 3 | "duty to cooperate" which is necessary before the City Plan can be finalised. Delete specific employment allocations from the Part 1 plan and undertake a thorough re-assessment of employment evidence. An oversupply of hotel rooms is of sufficient importance to be featured in the Challenges section 1.23. |
| | Total Representations | 27 | |
| | | | |

| Part Two: The | 31 Respondents | Representations | |
|---------------|----------------|-----------------|--|
| Strategy | Support | 26 | Welcome the overall vision set out in part 2 of the Plan, particularly pleased to support strategic objective SO12 A Strong and Prosperous City - will inevitably put pressure on the environment but must not be at the cost of the surrounding countryside including in particular the South Downs National Park Support for the overall aim to introduce/encourage low carbon transport - achieving a flexible transport network. Support for Strategic Objective (SO)9 welcome the Council's commitment to taking a key role in promoting the city as a gateway to the South Downs National Park City Plan Part One is the first Development Plan Document which provides a high level strategic and spatial vision plan for the future of Brighton & Hove. A policy should be included in the plan requiring a systematic |
| | Partly Support | 27 | review of the council's whole property portfolio with a view to releasing small sites for housing development. the plan should carry a clear message that redevelopments would be welcome outside the conservations areas, subject to certain criteria broadly supportive of the overall vision and objectives for Brighton & Hove, it is extremely disappointed that there is no identification of the contribution it can make to 'A Strong and Prosperous City'. Policies for the development areas and strategic allocations should not repeat citywide policy but instead should focus on outlining how and why a particular policy might be applied more or less vigorously in a particular area, or defining what the implementation of that policy would mean on the ground to aid clarity |

| | | To ensure that these objectives are realised the City Plan policies need to be appropriately drafted to reflect these goals and decisions on the allocation of specific sites should be left to the Part 2 document where an appropriate balancing exercise can be undertaken. |
|---------------|----|---|
| Object | 7 | The assessed housing requirements much higher than the city can realistically accommodate Minor changes recommended based on the potential transition of Brighton and Hove to a low carbon City: Suggestion of a new policy Preferred areas for developments - linking land use with transportation Continue Hangleton Link Road to Shoreham Harbour - new policy As the city develops more housing we need to make sure that land for schools and playing fields are provided for. The requirements for new homes should be met in full, if the City's constraints prevent the delivery of the full amount, the City Council should ensure, in accordance with the NPPF, that neighbouring authorities help to meet the identified needs. |
| Partly Object | 10 | The wording of the vision should ensure that these other employment generating uses are fully embraced and not unwittingly excluded City Plan should explicitly identify the school places and sites required for families already living in the Brighton and Hove area, and for those moving into the area, especially in parts of the city where there is already an acute shortage of school places. The City Plan does not appear to recognise the need to develop local food infrastructure that could enable the relocalisation of the food system Greater consistency needs to be shown in the City Plan towards biodiversity |

| | | | There should be more radical policies to claw back some out of town retail sites for employment use, such as the creation of reuse/recycling/upcycling parks to help achieve the city's zero waste ambitions. The DPD should support a more flexible, as opposed to prescriptive approach to mixed use development on the identified sites. The approach to the specific allocation of sites therefore needs to be carefully balanced and the selection of one specific use (i.e. B1 employment space) should not be unduly favoured against the provision of other uses. |

| | CP1 - 25 respondents | Representations | Main Comments |
| CP1 Housing Delivery | Support | 8 | Support for City Plan housing delivery target of 11,300 Support for an approach based on capacity and availability of land for housing set against high demand/requirements for housing and a context of significant physical and environmental constraints. Support for balanced strategy regarding future growth of the city (ie. the need to plan for jobs and other land use requirements as well as housing). |
| | Partly Support | 4 | Support for housing within DA7 Toads Hole Valley Development Area Some concerns expressed re. housing shortfall and meeting the Duty to Cooperate NPPF requirement. |

| | Object | 10 | Housing target is too low Housing target falls significantly short of forecast housing requirements for the city. Does not meet government policy set out in NPPF. Plan has not adequately addressed Duty to Cooperate. In view of city's housing requirements and particular need for affordable housing the Plan should look for more housing from the following suggested sources: urban fringe sites, reassessment required; employment sites, more flexibility required; reassessment of existing and additional areas for taller buildings. Housing Providers NPPF requirement for 5 year supply +5% buffer is not demonstrated. Does not meet NPPF requirements. Duty to co-operate is not demonstrated to show how unmet requirements will be met. Plan will be found unsound. Housing target is too high Housing target should be lower; city is tightly constrained; city cannot accommodate an ever-growing population; development should all be within built up area and all development should be an brownfield eiter; no development at Toole Help Velley. |
|-----------------|------------------------------|-----------------|--|
| | Partly Object | 3 | on brownfield sites; no development at Toads Hole Valley. A target of 10, 200 suggested. A target of 8,000 suggested. |

| Land | 9 1 | 3 | Particularly support the upgrade and refurbishment of the listed |
| CP3 Employment | CP3 - 17 respondents | Representations | Main Comments |
| | · | | |
| | CP2 Total Representations | 13 | |
| | Partly Object | 1 | Given requirement of CP2 Part 6 to provide training schemes during the construction phase, there is no justifiable reason to require financial contributions as well (this would duplicate the requirement). |
| | Object | 2 | In order to implement CP2, the Council must increase its housing provision so that it meets forecast requirements aligned to its economic growth aspirations There should be more detail in the role of skills in developing the economy and explain how it will facilitate closer links with the city's two universities and business to foster the knowledge based economy. Universities role as employment generators. Policy should look beyond just the modernisation and expansion of existing educational uses and embrace and support wider opportunities through the growth of educational tourism which have the potential to represent a significant positive contribution to the local economy. |

| | Object | 7 | The Council needs to be sure that it is protecting sites that genuinely meet the needs of industry The policy is inflexible and will constrain redevelopment, investment and new job creation. Up to date evidence base is required to justify policy. Part 5 of policy should be more flexible/ encouraging of alternative uses/ mixed use development. Test of redundancy too stringent and if redundant, sites should contribute further to supply of housing/ affordable housing. Identified sites (land north of Newtown Road and Franklin Road Industrial Estate) for employment-led mixed use development |
|-------------------------|------------------------------|-----------------|--|
| | Partly Object | 3 | should be released for other uses as demonstrably no longer required for that use. Question the employment allocations for Toads Hole Valley and Gas Work Site and need to ensure that City Plan Employment Policies do not contradict/ more restrictive than emerging policies for Shoreham Harbour. |

| | Support | 2 | Align CP6 with CP3 and seek affordable housing as an alternative use |
| | Partly Support | 0 | Support general approach but policy should be flexible to encourage other forms of tourist accommodation e.g. study hotel |
| | Object | 3 | Over supply already exists. Not matched by tourist |
| CP6 Visitor Accommodation | Partly Object | 0 | developments and therefore supply outstrips demand No need to protect hotel uses. Change of use to other uses should be made easier especially if unviable. 'Hotel Core Zone' approach is not welcome. Considered too inflexible. Encouragement of Impact Assessment insufficient – it should be mandatory so as to assess existing supply |
| | | 5 | · · · · · · · · · · · · · · · · · · · |

| | Representations | | |
|---------------------------------|------------------------------|-----------------|--|
| | | T = | |
| | CP7 14 respondents | Representations | Main Comments |
| | Support | 3 | Part Support for developer contributions but should be weighed up against wider public benefits – and early consultation is need to ensure CIL is not a prohibitive addition to City Plan. Affordable Housing should be priority as community benefit but will suffer if CIL unrealistic – and should be reduced or zero-tariff on appropriate sites with high AH. CIL is clearly untried and untested and could lead to disputes - |
| CP7 Infrastructure | Partly Support | 5 | CIL is clearly untired and diffested and could lead to disputes - perhaps not appropriate for City Plan at this stage. CIL should be used to fund community development work. Particular support of policy referencing Flood Risk, Water Efficiency and Groundwater quality. General comments on sustainability re food production. |
| CIL and Developer Contributions | Object | 2 | Plan seriously underplays changes needed to de-carbonise the city (to meet national CO2 reduction targets). IDP should be underpinned by policies in plan. Balance for setting a CIL is considered and recognised there will |
| | Partly Object | 3 | need to be exemptions due to viability. CIL should be simple and not affect viability. Large development should not be permitted in favour of multi-million CIL returns. CIL should not be charged to 'not for profit' organisation such as Universities – this may undermine other planning policies. Policy does not adequately support provision of water and wastewater infrastructure. Impacts on wastewater treatment works at Shoreham not fully considered and should be addressed in Shoreham Joint Area Action Plan (JAAP). May also impact on proposed development at Toads Hole Valley. |
| | CP7 Total Representations | 13 | |

| CP19 Housing Mix | CP19- 14 respondents | Representations | Main Comments |
| | Support | 4 | General support; housing delivery incorporating a mix incluprovision of affordable housing helps retention and recruitr of staff for local employers. General support; tackles equalities issues e.g. accommodation for disabled people and space for travellers is acknowledged. Needs of older people highlighted; accommodation for older. |
| | Partly Support | 4 | people should not be looked at only in terms of conventional housing but should also embrace care and extra care. Plan should ensure an adequate supply of accommodation to meet the diverse needs of older people. |

| Object | 4 | Policy should state clearly the preferred unit size mix as a citywide aspiration for the City Plan period. Too vague at the moment. If affordable housing mix can be specified why cant mix for all housing? If council wishes to improve choice/mix then it should seek to meet its forecast housing requirements. Housing mix policy should not be prescriptive or imposed by the Local Authority (LA). The LA should provide for a choice of sites in a choice of locations to provide for different types of dwellings to be provided. Mix will be influenced by viability; densities and site allocation. There should be a clearer statement referring to the shortage of family accommodation and need for more decent sized family housing; would like to see this addressed. Policy should set out minimum dwelling size standards. There should be a new separate policy that addresses housing for the elderly. Role of Private Rented Sector is ignored in the Plan; yet this is the only sector expanding. Need for shared accommodation (provided through private rented sector) not acknowledged in the Plan. Numerically greatest need is for single person |
