

Brighton & Hove City Council

Adult Care & Health Committee

Question

In City care homes set rate

The service users (residents) pay part of the care home fees and their contributions are increasing by 2.5% from April 2013.

A similar increase is necessary by the Council but we appreciate that sufficient funding is not available.

Would you please provide figures to show that increases of 2% or 1.5% are possible from the 2% inflation allowance referred to in 5.1.

The increased cost to the Council for a 2% increase after deducting the increase by the service users would be, for example, 1.35% of £460 (see Table One) and 1.41% of £504 (see Table One).
