Stanmer Heights	Orchid View	Patcham	N	0	0	0	0	0	0	0		

NOTES:

Results based on needs analysis carried out by Groundwork Solent

Areas with insufficient provision

Based on geographical analysis of catchment areas. Areas with low provision scored 10, others scored 0

Measure of deprivation

This figure is based on the total number of *super output* areas within the catchment of play area which are in the highest 20% deprived areas of the country. *Super output* areas are areas defined by the Office of National Statistics which have a population of approximately 1,500.

School/ Youth Club Totals

Number of schools/ youth clubs in catchment

Population Density

Score 1 if area is in 30% of areas of the city with highest population density of 0-15 year olds
Score 0 if not

Ease of access to alternative sites

Score 1 if access to other sites in the area is limited (if access is limited)
Score 0 if access to other sites is relatively easy

Condition/ Play Value

Combined score taking in to account condition of play equipment and play value. The lower the score the better the site.
Play value measured through number and types of play equipment on site.
